General Information

Journal references in Mathematical Reviews (MR) appear in the following form: *J. Utopian Math. Soc.* (6) **5(56)** (1995/96), *no.* 2, 18–53 (1997), where, after the abbreviated title, one has: (series number) volume number(volume number in first series, if given) (nominal date), issue number if given, first page–last page (imprint date). If only one date is given, it is the nominal date and follows the volume number. If no volume number is given, the year is used in its place. The symbol ★ precedes the title of a book or other item that is being reviewed as a whole; the symbol Ⓥ precedes the title of a videocassette. If an issue of a journal is to be reviewed as a whole and an ad hoc title is devised for this purpose then this title appears in braces { }. Articles that have been accepted for publication in certain important journals are now reviewed in MR from the final manuscript; the symbol ○ at the end of a review denotes such an item.

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume, page number and position on the page (e.g., MR **15**, 122c); from Volume 20 to Volume 58 (1979), by volume and review number (e.g., MR **20** #4185); from 1980 on, by issue and review number (e.g., MR 80a:46017). References to reviews in Jahrbuch über die Fortschritte der Mathematik are by volume, page number and position on the page (e.g., JFM 24.0048.02). References to reviews in Zentralblatt für Mathematik before Volume 218 (1972) are by volume, page number and position (last two digits) on the page (e.g., Zbl 047.06904); from Volume 218 on by volume and review number (e.g., Zbl 218.46017). References to reviews in Applied Mechanics Reviews, Computer & Control Abstracts, Physics Abstracts, Referativnyĭ Zhurnal Matematika (Mekhanika, etc.) or Statistical Theory and Method Abstracts are prefixed by AMR, CCA, PA, RZhMat (RZhMekh, etc.) or STMA respectively. Reviews reprinted from Zentralblatt für Mathematik are identified by the Zbl review number in parentheses following the reviewer's name.

Authors' names are given as listed in the item being reviewed. In order to identify each author uniquely, MR has assigned to certain authors' names an identifying form of the name. Superscript numbers are used in identifying forms where necessary. The identifying form is added in brackets following the published name.

Most review headings include institution codes. An institution code, indicating the author's address as listed in the reviewed item, consists of two [or three] parts separated by hyphens (e.g., 1-MR [or F-LYON-P]); these parts designate the country, the university or institution [and the department]. The absence of a department code usually indicates Department of Mathematics. Institution codes are also used to indicate the reviewer location for some reviewers. A list of codes appears in the most recent Annual Index of Mathematical Reviews.

Editorial Office: MR is a publication of the American Mathematical Society; it is edited at the University of Michigan in Ann Arbor. All editorial correspondence should be addressed to Mathematical Reviews, 416 Fourth Street, PO Box 8604, Ann Arbor, MI 48107-8604, USA; it may also be sent electronically via Internet to MATHREV@AMS.ORG or by FAX to (734) 996-2916. All other correspondence should be addressed to the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248, USA. Orders should be addressed to the American Mathematical Society, PO Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.*

Subscription information: Beginning with the subscription year 1994, there is a new pricing scheme for products derived from the Mathematical Reviews database, including MR. The list price for a 1998 subscription to MR, including the annual index, is $5,849 = $5,460 (Data Access Fee) + $389 (Product Delivery Fee for MR paper or microfiche). For Institutional or Corporate Members it is $4,757 = $4,368 (Data Access Fee) + $389 (Product Delivery Fee for MR paper or microfiche). Sites which have paid the Data Access Fee can obtain additional subscriptions to MR for $389 each. Individuals who are affiliated with a site which has paid the Data Access Fee can subscribe to MR for $389. Subscribers to paper MR outside the United States and India must pay a postage surcharge of $117. Subscribers to paper MR in India must pay a postage surcharge of $153. Expedited delivery to destinations in North America is $138; elsewhere $379.

Back volumes information: Back issues are available for all volumes of MR; price information can be obtained from the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248. Back volumes are also available in microform from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106-1346.

Cumulative indexes: There are sets of cumulative author and subject indexes that cover the entire span of MR from 1940–1984.

For additional subscription information and information about other products derived from the MR database, contact: Membership and Customer Service, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248; electronic mail = CUST-SERV@AMS.ORG; FAX = (401) 331-3842.

Mathematical Reviews (USPS 333-940) is published monthly plus, in December, an annual author and subject index issue, by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Periodicals postage paid at Providence, RI, and additional mailing offices. Postmaster: Send address changes to Mathematical Reviews, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248.

PREFACE

This annual index of Mathematical Reviews (MR) is included with each subscription and is also available separately. It is also called Volume 30 of the Index of Mathematical Papers (IMP). Volumes 6–9 of IMP are the annual indexes of MR for the years 1974–77 and are available as a set. The 1978 annual index was the first to be included with each subscription. There are cumulative author indexes to MR that cover 1940–59 (Vols. 1–20), 1960–64 (Vols. 21–28) and 1965–72 (Vols. 29–44), subject indexes for 1940–58 (Vols. 1–19) and 1959–72 (Vols. 20–44), and author and subject indexes for 1973–79 (Vols. 45–58) and 1980–84.

The classification scheme used in the present index is the 1991 Mathematics Subject Classification (MSC). A copy of the 1991 MSC is printed in the back of the subject portion of this index.

The entries in the author, key and subject indexes are comprised of all items reviewed in MR during a given year and some items which will not be reviewed by MR but which have appeared in Current Mathematical Publications (CMP). A star (★) preceding a title indicates a book or other item that is reviewed as a whole. The symbol Ⓥ preceding a title indicates that the item is a videocassette.

Author index; separate key index

The entries in the author and key indexes give full bibliographic information. These entries are accompanied by review numbers {if available} and classification numbers; secondary classification numbers are given in parentheses. Entries are listed alphabetically by author; entries having several authors are listed in full under each author. Surnames consisting of more than one part (e.g., del Olmo, van der Mee) are listed under the first capital letter. Collections of papers, proceedings, bibliographies, tables, etc. that are edited rather than authored are listed in the key index by title and by "key entry". For example, the publication entitled *Differential equations* is listed under **Differential equations** and is also listed under **Conference: Differential Equations** and under the location of the conference. Some monographic series (e.g., American Mathematical Society Translations, Series 2) have entries under the series title in this index.

Arrangement of entries in the author and key indexes

For a given heading (i.e., the primary name of an author, or a title), full entries are listed in order of nominal publication dates; the cross-references are in MR number order after the full entries. The arrangement of each entry is the same as in the heading of its review in MR. The general form for entries is as follows:

Books, Monographs. (Coauthors {if necessary}) ★Title. (Language of original {if necessary}. Summary languages {if necessary}) [English translation of title {if necessary}] Miscellaneous information {edition, editors, translators, series, etc.}. Publisher, city, date. Pagination. ISBN. (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

Journal article. (Coauthors {if necessary}) Title of article {in English translation if the original title is not in English, French or German}. (Language of original {if necessary}. Summary languages {if necessary}) [English translation of title {if necessary}] Journal abbreviation {including series number if necessary} Volume number(volume number in first series {if given}) (nominal date), issue number {if necessary}, pagination (imprint date {if necessary}). (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

The first three digits of the review number of an item refer to the MR issue in which the review is published and the last five digits refer to its position within that issue. The first two digits after the colon are the general subject classification of the item.

The phrase "EA 98m" after an MR number indicates that an MR erratum or addendum to the review appears at the end of the 98m issue.

Subject index

The entries in the subject index are arranged in classification order. For a given classification, all entries with that classification as a primary appear first, with authored entries appearing before unauthored entries. These are followed by entries with that classification as a secondary. Again, authored entries appear before unauthored entries. Each section under a given classification is arranged in alphabetical order. For each entry, the author(s), title, language, translated title {if necessary} and the review number {if available} appear at the first author only. The entries for subsequent authors are cross-references to the first author. Complete bibliographic information is available in the annual author and key indexes as well as in the MR review.

Cross-references

There are four kinds of cross-references in these indexes:

Name variations. An author's preferred name is the variation of the name that MR has chosen on the basis of frequency and currency of usage. Items by a given author are usually listed under the author's preferred name. In the author index, cross-references to the preferred form are given from sufficiently distinct alternative forms of the author's name.

Authors in other capacities. In the author index, the names of persons associated with an item in a capacity other than that of author (e.g., editor, translator, subject of a biography, etc.) are also listed. In the subject index, such names appear in parentheses. In both indexes these items occur only as cross-references to complete listings.

Key entries. Cross-references for such entries as bibliographies, obituaries and references to special events are made to the authors of the papers in which these items appear, e.g. **Bibliography: Ruffini, Paolo** *see* **Barbieri, Francesco, 98g:01001**.

Unreviewed entries. Some entries in these indexes have not been reviewed in MR (e.g., items that do not appear to be in final form, or that are at the fringes of MR's scope) although they have been listed in CMP. Unreviewed items appear in the author, key and subject indexes in a format similar to that of reviewed items. For unreviewed items that are part of a collection, the review number in parentheses is a cross-reference to the table-of-contents review, i.e. (see 98x:xxxxx) or (98x:xxxxx). For unreviewed items that are not part of a collection, there is no review number cross-reference.

Transliteration

Since 1983, MR has used the Cyrillic transliteration in use by ANSI, LC, Zbl, ISI, and others. This is also the system used throughout this index. A Cyrillic transliteration table appears at the end of the author/key index.

Names of Chinese authors

The name of a Chinese author appears in the index in Western form. For example, Chen Lan Sun will be listed as Chen, Lan Sun, as though the author's name were Lan Sun Chen. The pinyin transliteration is used for mainland Chinese authors and the Wade-Giles transliteration is used for Taiwanese authors.

In an undertaking of this size, errors are inevitable, despite elaborate precautions and checks. The editors of Mathematical Reviews would be very glad to have their attention drawn to errors in this index and also in the earlier indexes.

Note: The annual index no longer includes a listing of the institution codes used in MR issues and in CMP (or of the associated addresses). A complete, searchable list is available on e-MATH, the AMS web site (http://www.ams.org/).

(Summary) **98e:41003** 41A10 (30E10)

— Modern methods of the geometric theory of functions of a complex variable in approximation problems. (Russian. Russian summary) *Algebra i Analiz* **9** (1997), *no.* 3, 3–40; *translation in St. Petersburg Math. J.* **9** (1998), *no.* 3, 421–453. (Yuri A. Farkov) **98h:30009** 30C35 (30C62, 30E10, 41A30)

— Nonlinear conformal modeling in approximating theory. Proceedings of the Second World Congress of Nonlinear Analysts, Part 1 (Athens, 1996). *Nonlinear Anal.* **30** (1997), *no.* 1, 291–300. (*see* **98i:00027**) 41A65 (30C35, 30E10)

Belykh, V. N. (*with* Bykov, V. V.) Bifurcations for heteroclinic orbits of a periodic motion and a saddle-focus and dynamical chaos. (English summary) Applications of chaos (Inowłodz, 1996). *Chaos Solitons Fractals* **9** (1998), *no.* 1-2, 1–18. (Summary) **98k:58165** 58F14 (58F13)

Belytschko, Ted (*with* Liu, Wing Kam; Li, Shaofan) Moving least-square reproducing kernel methods. I. Methodology and convergence. (English summary) *Comput. Methods Appl. Mech. Engrg.* **143** (1997), *no.* 1-2, 113–154. (Zhangxin Chen) **98e:65098** 65N30 (76M10)

— (*with* Krongauz, Y.) Consistent pseudo-derivatives in meshless methods. (English summary) *Comput. Methods Appl. Mech. Engrg.* **146** (1997), *no.* 3-4, 371–386. (Summary) **98e:65106** 65N50 (73V25)

— (*with* Krysl, Petr) Element-free Galerkin method: convergence of the continuous and discontinuous shape functions. (English summary) *Comput. Methods Appl. Mech. Engrg.* **148** (1997), *no.* 3-4, 257–277. (Wu Zhang) **98j:73090** 73V05 (65M12, 65N30)

— (*with* Xu, Yonglin; Moran, Brian) Self-similar crack expansion method for three-dimensional crack analysis. (English summary) *Trans. ASME J. Appl. Mech.* **64** (1997), *no.* 4, 729–737. 73M25

— (*with* Chung, Heung-Jin) An error estimate in the EFG method. (English summary) *Comput. Mech.* **21** (1998), *no.* 2, 91–100. (Summary) **98m:73077** 73V05

— (*with* Liu, Wing Kam; Guo, Yong; Tang, Sing) A multiple-quadrature eight-node hexahedral finite element for large deformation elastoplastic analysis. (English summary) *Comput. Methods Appl. Mech. Engrg.* **154** (1998), *no.* 1-2, 69–132. (Summary) **98k:73065** 73V05 (73E99, 73G20)

— (*with* Krongauz, Y.) EFG approximation with discontinuous derivatives. (English summary) *Internat. J. Numer. Methods Engrg.* **41** (1998), *no.* 7, 1215–1233. (Summary) **98k:73064** 73V05

Belyutin, S. V. Investigation of the exact integrability of the multiwave nonlinear Schrödinger equation. (Russian. English and Russian summaries) *Teoret. Mat. Fiz.* **110** (1997), *no.* 2, 242–253; *translation in Theoret. and Math. Phys.* **110** (1997), *no.* 2, 190–198. (Summary) **98f:35132** 35Q55 (58F07)

Belzunce, Felix (*with* Candel Ato, José; Ruiz Gómez, José María) The ageing curve and partial orderings of life distributions. (English summary) *Statist. Papers* **37** (1996), *no.* 2, 141–152. (S. N. Alam) **98f:62287** 62N05 (62G05)

— (*with* Navarro, Jorge; Ruiz Gómez, José María) New stochastic orders based on double truncation. (English summary) *Probab. Engrg. Inform. Sci.* **11** (1997), *no.* 3, 395–402. (Summary) **98b:60151** 60K10 (60E99)

— (*with* Pellerey, Franco; Ruiz Gómez, José María; Shaked, Moshe) The dilation order, the dispersion order, and orderings of residual lives. (English summary) *Statist. Probab. Lett.* **33** (1997), *no.* 3, 263–275. (Robert Kertz) **98i:60014** 60E15 (62N05)

Bemelmans, J. (*with* Chipot, M.) Minimal energy for a free ball on an elastic membrane. *Energy methods in continuum mechanics* (*Oviedo*, 1994), 22–30, *Kluwer Acad. Publ., Dordrecht*, 1996. (Catherine Bandle) **98c:49021** 49J40 (70K99, 73V25)

van Bemmelen, T. (*with* Gragert, P. K. H.; Kersten, P. H. M.) Symmetries and conservation laws of the system: $u_x = vw_v$, $v_y = uw_u$, $uv + w_{xx} + w_{yy} = 0$. (English summary) *Acta Appl. Math.* **47** (1997), *no.* 1, 79–99. (Juha Pohjanpelto) **98b:35113** 35L65 (35A30, 58G37)

Bemporad, Alberto (*with* Casavola, Alessandro; Mosca, Edoardo) Nonlinear control of constrained linear systems via predictive reference management. (English summary) *IEEE Trans. Automat. Control* **42** (1997), *no.* 3, 340–349. (Andrzej Świerniak) **98a:93043** 93C41 (90C20, 93B51, 93C25)

— Reference governor for constrained nonlinear systems. (English summary) *IEEE Trans. Automat. Control* **43** (1998), *no.* 3, 415–419. 93C10 (93B50)

garcia Ben, M. *see* **Garcia Ben, M.**

Benã, Maria Aparecida (*with* Dos Reis, José Geraldo) A stability theorem in terms of two measures. *Nonlinear Anal.* **29** (1997), *no.* 7, 737–740. (A. A. Martynyuk) **98g:34122** 34K20

Ben Abda, Amel (*with* Andrieux, Stéphane; Bui, Huy Duong) Sur l'identification de fissures planes via le concept d'écart à la réciprocité en élasticité. (English and French summaries) [Identification of planar cracks in elasticity via the reciprocity gap concept] *C. R. Acad. Sci. Paris Sér. I Math.* **324** (1997), *no.* 12, 1431–1438. (Giovanni Crosta) **98e:73044** 73C99 (35Q72, 73M25)

— (*with* Bannour, Tarek; Jaoua, Mohamed) A semi-explicit algorithm for the reconstruction of 3D planar cracks. (English summary) *Inverse Problems* **13** (1997), *no.* 4, 899–917. (Summary) **98c:65198** 65N99 (78A55, 80A20)

Benabdallah, Assia (*with* Ammar Khodja, Farid; Teniou, Djamal E.) Dynamical stabilizers and coupled systems. (English summary) *Élasticité, viscoélasticité et contrôle optimal* (*Lyon*, 1995), 253–262 (*electronic*), *ESAIM Proc.*, 2, *Soc. Math. Appl. Indust., Paris*, 1997. (Krystyn Styczeń) **98k:93091** 93D15 (34G10, 34H05, 47D06, 47N70, 93C20)

— (*with* Ammar Khodja, Farid; Teniou, Djamal E.) Sur la stabilisation d'un couplage ondes-advection. [Stabilization of a wave-advection coupling] *Portugal. Math.* **54** (1997), *no.* 3, 335–344. (De Xing Feng) **98i:93073** 93D15 (35L10, 93C20)

Ben Abdallah, Naoufel (*with* Degond, Pierre) The Child-Langmuir law in the kinetic theory of charged particles: semiconductors models. *Mathematical problems in semiconductor physics* (*Rome*, 1993), 76–102, *Pitman Res. Notes Math. Ser.*, 340, *Longman, Harlow*, 1995. (Introduction) **98j:82074** 82D99 (78A55)

— (*with* Degond, Pierre) On a hierarchy of macroscopic models for semiconductors. (English summary) *J. Math. Phys.* **37** (1996), *no.* 7, 3306–3333. (Summary) **98b:82091** 82D99 (82C70)

— (*with* Unterreiter, Andreas) Stationary voltage current characteristics of a plasma. (English and French summaries) *RAIRO Modél. Math. Anal. Numér.* **30** (1996), *no.* 5, 575–605. (Summary) **98i:76109** 76X05 (34B15, 76M30, 82D10)

— (*with* Degond, Pierre; Markowich, Peter A.) On a one-dimensional Schrödinger-Poisson scattering model. (English summary) *Z. Angew. Math. Phys.* **48** (1997), *no.* 1, 135–155. (Summary) **98b:82092** 82D99 (34B24, 34L40, 82C70)

Ben Abdelaziz, F. (*with* Lang, Pascal; Nadeau, R.) Dominance and efficiency in multiobjective stochastic linear programming. (English summary) *Advances in multiple objective and goal programming* (*Torremolinos*, 1996), 160–169, *Lecture Notes in Econom. and Math. Systems*, 455, *Springer, Berlin*, 1997. (*see* **98g:90002**) 90C29 (90C15)

Benabdellah, H. (*with* Castaing, Charles; Salvadori, Anna; Syam, A.) Nonconvex sweeping process. (English summary) *J. Appl. Anal.* **2** (1996), *no.* 2, 217–240. (Fabián Flores-Bazán) **98c:34096** 34G20 (34A60, 47N20, 49J24)

— (*with* Castaing, Charles; Salvadori, Anna) Compactness and discretization methods for differential inclusions and evolution problems. (English summary) *Atti Sem. Mat. Fis. Univ. Modena* **45** (1997), *no.* 1, 9–51. (Manuel D. P. Monteiro Marques) **98d:34025** 34A60 (34G20, 49J24)

Ben Abdesselem, Adnène (*with* Cherrier, Pascal) Équations de type Monge-Ampère sur certaines variétés de Fano. (English and French summaries) [Monge-Ampère equations on certain Fano manifolds] *C. R. Acad. Sci. Paris Sér. I Math.* **325** (1997), *no.* 3, 319–322. (Sławomir Kołodziej) **98h:32023** 32F07 (32L07)

— Équations de Monge-Ampère d'origine géométrique sur certaines variétés algébriques. (English summary) [Monge-Ampère equations of geometric origin on certain algebraic varieties] *J. Funct. Anal.* **149** (1997), *no.* 1, 102–134. (Sławomir Kołodziej) **98i:32020** 32F07 (32J18)

Bénabou, Jean Rapports entre le fini et le continu. [Relations between the finite and the continuous] *Le labyrinthe du continu* (*Cerisy-la-Salle*, 1990), 178–189, *Springer, Paris*, 1992. (M. Randall Holmes) **98h:03066** 03E70 (00A30, 03A05)

Ben-Abraham, Shelomo I. (*with* Kramer, Peter; Beck, Uwe) Automorphisms and discrete fiber bundles. *Symmetries in science, IX* (*Bregenz*, 1996), 179–192, *Plenum, New York*, 1997. (Karel A. Dekimpe) **98h:20089** 20H15 (82D25)

Ben Adda, Fayçal Fourier's transform and Nishimoto fractional calculus. (English summary) *J. Fract. Calc.* **10** (1996), 41–50. (Summary) **98g:26009** 26A33 (42A38)

— Geometric interpretation of the fractional derivative. (English summary) *J. Fract. Calc.* **11** (1997), 21–51. (Mridula Garg) **98f:26004** 26A33

Benaïm, Michel Vertex-reinforced random walks and a conjecture of Pemantle. (English summary) *Ann. Probab.* **25** (1997), *no.* 1, 361–392. (János Tóth) **98d:60128** 60J10 (34F05, 60J15)

— (*with* Fort, Jean-Claude; Pagès, Gilles) Convergence presque sûre de l'algorithme de Kohonen unidimensionnel. (English and French summaries) [The a.s. convergence of the one-dimensional Kohonen algorithm] *C. R. Acad. Sci. Paris Sér. I Math.* **324** (1997), *no.* 12, 1407–1412. (Summary) **98d:60059** 60F15 (60J20, 62L20, 68T05, 92B20)

— On invariant hypersurfaces of strongly monotone maps. (English summary) *J. Differential Equations* **137** (1997), *no.* 2, 302–319. (Janusz Mierczyński) **98d:58114** 58F12 (34C30, 34C35, 34D35)

Benalycherif, Mohamed-Lyes (*with* Girault, Claude) Behavioural and structural composition rules preserving liveness by synchronization for colored FIFO nets. (English

summary) *Application and theory of Petri nets* 1996 (*Osaka*, 1996), 73–92, *Lecture Notes in Comput. Sci.*, 1091, *Springer, Berlin*, 1996. (Summary) **98e:68189** 68Q90

Ben Amar, M. (*with* Pomeau, Y.) Crumpled paper. (English summary) *Proc. Roy. Soc. London Ser. A* **453** (1997), *no.* 1959, 729–755. (Pierre Aimé) **98c:53002** 53A05 (73K10)

Benameur, Moulay-Tahar A longitudinal Lefschetz theorem in K-theory. (English summary) *K-Theory* **12** (1997), *no.* 3, 227–257. (Hiroshi Takai) **98j:19007** 19L47 (19K56, 19M05, 58G12)

— Triangulations and the stability theorem for foliations. (English summary) *Pacific J. Math.* **179** (1997), *no.* 2, 221–239. (Hiroshi Takai) **98e:46089** 46L85 (57R30, 58G12)

Benammar, Mabrouk (*with* Arnal, Didier; Selmi, Mohamed) Normalisation d'une représentation non linéaire d'une algèbre de Lie. (English and French summaries) [Normalization of a nonlinear representation of a Lie algebra] *Ann. Fac. Sci. Toulouse Math.* (5) **9** (1988), *no.* 3, 355–379. (Summary) **98h:17003** 17B10

Benamor, S. (*with* Besançon, Gildas; Hammouri, H.) State equivalence of discrete-time nonlinear control systems to state affine form up to input/output injection. (English summary) *Systems Control Lett.* **33** (1998), *no.* 1, 1–10. (Summary) **98k:93021** 93B17 (93B07, 93C10)

Benamou, Jean-David A domain decomposition method with coupled transmission conditions for the optimal control of systems governed by elliptic partial differential equations. (English summary) *SIAM J. Numer. Anal.* **33** (1996), *no.* 6, 2401–2416. (Pekka Neittaanmäki) **98b:65071** 65K10 (49M25, 65N30, 65Y05)

— (*with* Després, Bruno) A domain decomposition method for the Helmholtz equation and related optimal control problems. (English summary) *J. Comput. Phys.* **136** (1997), *no.* 1, 68–82. (Summary) **98c:65162** 65M55 (49K20)

Ben-Amram, Amir M. (*with* Galil, Zvi) Lower bounds on algebraic random access machines (extended abstract). (English summary) *Automata, languages and programming* (*Szeged*, 1995), 360–371, *Lecture Notes in Comput. Sci.*, 944, *Springer, Berlin*, 1995. (*see* **98c:68007**) 68Q05 (68Q25)

— (*with* Galil, Zvi) When can we sort in $o(n \log n)$ time? (English summary) 34th Annual Symposium on Foundations of Computer Science (Palo Alto, CA, 1993). *J. Comput. System Sci.* **54** (1997), *no.* 2, *part* 2, 345–370. (Friedhelm Meyer auf der Heide) **98m:68049** 68P10 (68Q05, 68Q25)

— Introducing: reasonable complete programming languages. *Bull. Eur. Assoc. Theor. Comput. Sci. EATCS No.* 64 (1998), 153–155. 68N15 (68Q05)

Benaoum, H. B. (*with* Lagraa, M.) $U_q(2)$ Yang-Mills theory. (English summary) *Internat. J. Modern Phys. A* **13** (1998), *no.* 4, 553–568. (Mathias Pillin) **98m:81071** 81R50 (81T13)

Ben-Arie, Jezekiel (*with* Wang, Zhiqian) Gabor kernels for affine-invariant object recognition. (English summary) *Gabor analysis and algorithms*, 409–426, *Appl. Numer. Harmon. Anal., Birkhäuser Boston, Boston, MA*, 1998. (*see* **98h:42001**) 94A12 (68T10)

Ben Arous, Gérard (*with* Cerf, Raphaël) Metastability of the three-dimensional Ising model on a torus at very low temperatures. (English summary) *Electron. J. Probab.* **1** (1996), *no.* 10, *approx.* 55 *pp.* (*electronic*). (Peter Eichelsbacher) **98a:82086** 82C44 (05B50, 60J10, 60K35)

— (*with* Guionnet, Alice) Large deviations for Wigner's law and Voiculescu's non-commutative entropy. (English summary) *Probab. Theory Related Fields* **108** (1997), *no.* 4, 517–542. (Alexei Khorunzhy) **98i:15026** 15A52 (46L50, 60F10)

— (*with* Guionnet, Alice) Langevin dynamics for Sherrington-Kirkpatrick spin glasses. *Mathematical aspects of spin glasses and neural networks*, 323–353, *Progr. Probab.*, 41, *Birkhäuser Boston, Boston, MA*, 1998. (*see* **98i:82002**) 82D30 (82C31)

Ben-Artzi, Matania (*with* Nemirovsky, Jonathan) Remarks on relativistic Schrödinger operators and their extensions. (English and French summaries) *Ann. Inst. H. Poincaré Phys. Théor.* **67** (1997), *no.* 1, 29–39. (Rainer Hempel) **98j:47103** 47F05 (35J10, 47N50, 81Q10)

— On spectral properties of the acoustic propagator in a layered band. (English summary) *J. Differential Equations* **136** (1997), *no.* 1, 115–135. (Yongzhi Xu) **98f:35111** 35P05 (35J05, 47F05)

Ben-Asher, Yosi (*with* Newman, Ilan) Geometric approach for optimal routing on a mesh with buses. (English summary) *J. Comput. System Sci.* **54** (1997), *no.* 3, 475–486. (Summary) **98d:68024** 68M10 (68Q10)

Benassi, Albert (*with* Jaffard, Stéphane; Roux, Daniel) Gaussian elliptic processes. (English summary) *Stochastic analysis: random fields and measure-valued processes* (*Ramat Gan*, 1993/1995), 35–48, *Israel Math. Conf. Proc.*, 10, *Bar-Ilan Univ., Ramat Gan*, 1996. (Akio Noda) **98e:60055** 60G15 (60G17, 60G18, 60G60)

— Arbres et grandes déviations. (English and French summaries) [Trees and large deviations] *Trees* (*Versailles*, 1995), 135–140, *Progr. Probab.*, 40, *Birkhäuser, Basel*, 1996. (Christian Maes) **98f:05042** 05C05 (60F10, 60G18)

— Arbres et grandes déviations. (English and French summaries) [Trees and large deviations] *Séminaire d'Analyse*, 1994–1995 (*Aubière*), Exp. No. 20, 6 *pp.*, *Sémin. Anal. Univ. Blaise Pascal* (*Clermont II*), 10, *Univ. Blaise Pascal* (*Clermont II*), *Clermont-Ferrand*, 1997. (Summary) **98h:60031** 60F10 (60G50)

— (*with* Jaffard, Stéphane; Roux, Daniel) Elliptic Gaussian random processes. (English and French summaries) *Rev. Mat. Iberoamericana* **13** (1997), *no.* 1, 19–90. (Christian Houdré) **98k:60056** 60G15 (60G60, 60J05)

Benassi, Paola (*with* Artosi, Alberto; Governatori, Guido; Rotolo, Antonino) Labelled proofs for quantified modal logic. (English summary) *Logics in artificial intelligence* (*Évora*, 1996), 70–86, *Lecture Notes in Comput. Sci.*, 1126, *Springer, Berlin*, 1996. (Summary) **98d:03024** 03B45 (68T27)

Benatti, Fabio (*with* Floreanini, Roberto) Testing complete positivity. (English summary) *Modern Phys. Lett. A* **12** (1997), *no.* 20, 1465–1472. (Robert Alicki) **98f:82084** 82C10 (81V25)

— (*with* Floreanini, Roberto) Completely positive dynamical maps and the neutral kaon system. (English summary) *Nuclear Phys. B* **488** (1997), *no.* 1-2, 335–363. (Robert Alicki) **98d:82032** 82C10 (46L57, 46L60, 81V25)
